

DOCUMENT EXPRESS, INC.

DX Initial Disclosures

At Document Express we understand that every lender has different needs and requirements and that your document provider should work alongside you. We personally take the time to understand the challenges you are facing and work to find a document solution that is right for you. The Document Express DX Elite Series combines state-of-the-art technology solutions with an engaging user experience to provide you best in class: Initial Disclosures, Closing Documents, High Cost Analysis and Flood Determinations.

Document Express brings you a tool to make Initial Disclosures safe, simple, fast and inexpensive. Placing initial disclosures into the hands of your new loan applicants quickly is a must needed task. The Truth-in-Lending regulation requires that these documents be postmarked within a specific 72-hour timeframe. Satisfying this requirement can be a labor-intensive process involving preparation, postage fees and late night runs to the post office. Preparation, delivery and return take time and can delay the origination process. Document Express e-Disclosure changes all of this. Let DX process your initial disclosures and deliver the documents electronically through our secure pick-up. Within a few seconds, your borrowers are viewing their documents. The entire initial disclosure process is accomplished almost immediately. No paper, toner, labor, postage or delays and the process is legal and complete!

Document Express also proudly offers eSignature, eDelivery and Fulfillment services for DX Initial Disclosures powered by eLynx. Our eSign interface is fully automated...no manual placing of signature tabs required!
